ANALYSIS OF TAXES AND SUBSIDIES RELEVANT TO PACIFIC OCEAN HEALTH

This report examines how Pacific governments can use taxes and subsidies as a financial lever to support the health of the Pacific Ocean. It surveys taxes and subsidies that are aligned with, or pose a risk to, ocean health in the Pacific.

In this report:

Regional economic
context

Conceptual model used to
define and understand the
role of taxes and
subsidies in ocean health

Conceptual model used to
define and understand the
role of taxes and
subsidies in ocean health

Status and Opportunities

Findings: ocean related
taxes and subsidies

ANALYSIS AND DEVELOPMENT OF A REPLICABLE COMMUNITY MANAGED MARINE AREA FINANCE MECHANISM

The objective of this study is to contribute to the further growth of sustainably managed marine areas by developing finance mechanisms that:

- mitigate risks to Pacific Ocean health, and
- increase resilience of Pacific Ocean communities

In this report:

**Status quo of
community managed
marine areas in the
Pacific**

**Towards governance for
the support of local
management**

**Key summary of
stakeholder
consultations**

**Innovating CMMA
Finance mechanisms**

**From concept to scale -
guidance for pilot
implementation and
replication**

FUNDING MARINE PROTECTION AT SCALE

From the outset, the primary objective was to codify early lessons learned from the past two decades of LSMPA management and combine it with experience from other sectors and related contemporary research and literature. The findings outlined in this report build on and complement existing standards. The goal is for readers to be able to readily and easily put into practice the information offered.

In this report:

**Sustainable financing
and Large-scale Marine
Protected Areas**

**Current seascape of
financing at scale**

**Finance
recommendations**

Finance guidelines

**LSMPA financing
literature review and
desktop review of 10
LSMPAs**

ANALYSIS AND DEVELOPMENT OF A PACIFIC OCEAN BOND

The Pacific Ocean Bond project under the Pacific Ocean Finance Program (POFP) explores how carefully designed bond structures can meet the strategic priorities of mitigating risks to ocean health, increasing the resilience of Pacific communities, generating sustainable economic development opportunities across multiple sectors, and attracting longer-term capital to the Pacific region. It also seeks to build support and develop guidance for potential issuers and project developers for issuance of such a bond instrument.

In this report:

The need for capital in the Pacific region for ocean health

Considerations around bond financing

Regional context & Potential financing needs

Challenges on Bond issuance in the region

Bond structure Comparisons, concept notes and Implementation considerations
